CALPLAS PRESSURE VESSELS

Calplas vessels have been used in industrial projects worldwide since 1970 and it is one of the most experienced filter manufacturer in the world. A continuous growth, stimulated by a very hard working, experienced team, and a mechanical engineer soul has allowed us to become a quality and reliability reference. During this period our manufacturing has demonstrated the complete reliability of our products. Our daily contact with water treatment companies and experienced pool distributors all over the world has also helped us to innovate and to gain an advantage over our competitors responding to new water treatment challenges. This experience has also allowed us to trial new materials in order to overcome specific project water treatment requirements.

WHY CALPLAS?

The first question is which is the best material for a vessel?

Steel tanks :

PROS: Very reliable and strong vessels.

CONS: These suffer from corrosion and require continuous maintenance to replace the different linings used (epoxy painting, rubber coatings...).

Fiber Glass vessels:

PROS: No corrosion.

CONS: Most polyester vessels are built for the swimming pool industry, where both pressure requirements and reliability fall far short of what is required in any industrial project.

Why choose between one or the other?

Calplas uses only the most reliable GRP Polyester technology in its manufacturing process. MANUALLY LAMINATED HAND LAY UP. This means that the fibers are oriented in the directions of the maximum tensions of the filter, strictly calculated. On top, this is combined with **encapsulated internal steel reinforcement** used at all points where the filter is under additional stress. This makes our filters the most reliable on the market.

Calplas filters are as strong as steel with the corrosion resistance of the polyester reinforced with fiberglass

No other manufacturer has more than 50 years experience in :

- Filtration systems
- Ion exchanger vessels
- Adequate internal lining adaptation

After 50 years of manufacturing direct collaboration with water treatment companies and pool distributors, **Calplas is proud to manufacture the best filters in the world**, with an outstanding reliability, durability and performance.

CALPLAS 2020

TECHNICAL DATA

Manually laminated hand lay-up polyester resin fiberglass to controlled thickness.

Expected lifespan: more than 30 years.

The strength of steel
The chemical corrosion resistance of polyester.

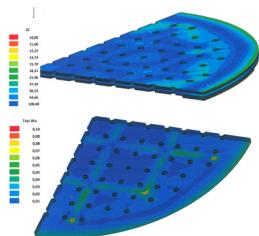

FIGURE 13. MAT LAYERS TS41/W AND SC

Engineering soul.

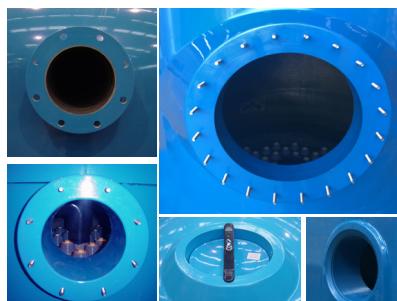

Sold worldwide with complete reliability since 1970.

Armoured nozzle plate.

Optimized distribution systems for flow distribution and each application

Complete safety:
Connections are part of the structure.

100% full vision inside:
Methacrylate sightglasses

Each and every filter is tested.

Closed legs are part of the filter structure.

On site assembling

Special colors on demand

UV resistant external gel coat.

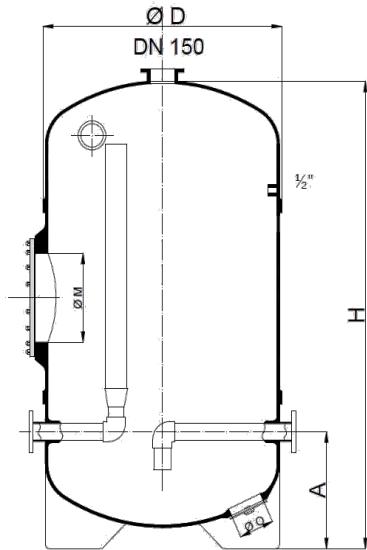

Wind & Seismic Calculation

Replace/Upgrade your filter
PLUG & PLAY

CO SERIES

Manufactured for more than 20 years for the Swiss market, Ozone tanks by Calplas CO Series are opened to all markets in 2020.

Diameter range: 415 mm - 1840 mm

Volume range: 0.2 m³ - 5 m³

Design pressure 2.5 bar

Test pressure 3.75 bar

Chemical resistance

1 ppm Ozone concentration

[Check them in page 18 & 19](#)

20% REDUCTION ON STANDARD PUMP STRAINERS

STANDARD PUMP STRAINERS

Our fantastic pump strainers are now available standard in certain connection sizes.

Always Pos 2.

[Check them in page 21](#)

STANDARD PUMP COLLECTORS

We always had the possibility to manufacture pump strainers with more than 2 flanges. Now we have some standard models.

1 inlet 2 outlet / 2 inlet 1 outlet

DPS/420 SERIES 1200 BED HEIGHT

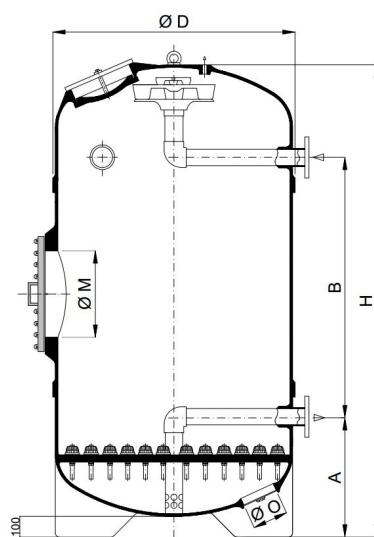

ADDITIONAL OPTIONS

Dimensions in mm.

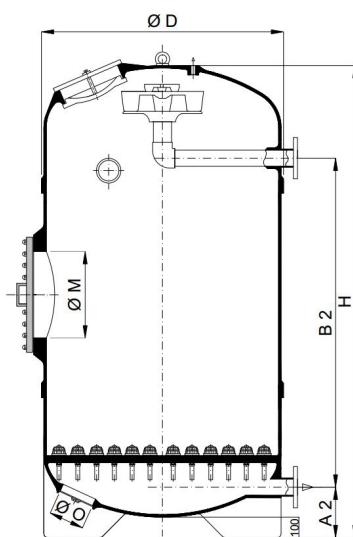

Manufactured and calculated according to EN 13121-3.
 Design pressure 2,5 Kg/cm² | Test pressure 3,75 Kg/cm².
 Steel reinforced lateral Ø420 manhole.
 Steel reinforced nozzle plate.
 GRP Flanged connections.
 GRP Calplas diffuser.
 Elliptical top manhole.
 Lifting lug.
 Sight glass 4" to 6".
 GRP reinforced internal piping.
 Bottom emptying hole.
 Design temperature 40°C.

Additional sight glass [See page 23](#)
 High temperature.
 Available for higher pressure up to 6 kg/cm².
 Customizable height.
 Other flange sizes available [See page 23](#)
 Different connections.
 Ad-hoc holes and sight glasses orientation.
 Optional Ø500 manhole.
 A2 & B2 connections available. Ask for measures.

CHARACTERISTICS

1 bar Max. pressure.
Quick opening device.
304 Stainless steel Ø4 mm hole.
Extremely robust.
Designed for suction side.

MARBLE SERIES

Dimensions in mm.

Design pressure 2,5 Kg/cm² | Test pressure 3,75 Kg/cm².
Very large transparent top lid.
Internal steel reinforced filter.
Female threads GAS in GRP are part of the body.
DN 32 Flange in GRP.

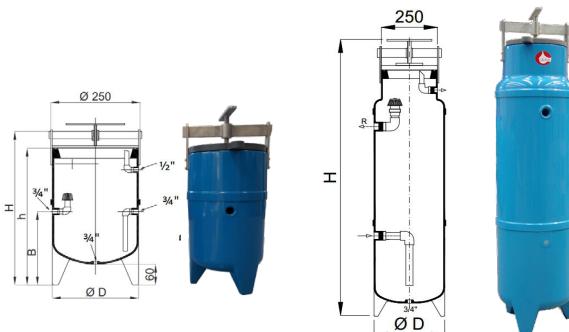

Marble filters are calcium reactors designed to restore alkalinity levels by dissolving calcium carbonate into pool water to maintain stable pH and ensure efficient flocculation. Required for all swimming pools equipped with chlorine gas. Of Benefit also in all pools in soft water areas. Installed after the chlorine gas injection point or immediately after the acid dosing point.

THE UNIQUE BIORESISTANT ACTIVATED FILTER MEDIA

AFM® is an Activated Filter Media manufactured from green glass to replace sand in all types of sand filters. AFM® is a revolutionary step by providing more than a 30 % performance benefit over sand. The activated surface of AFM® is self-sterilizing which prevents bacteria mud-balling, coagulation and worm-hole channelling of unfiltered water through the filter bed. Activation increases the surface area dramatically. Similar to activated carbon, the surface nano-structure adsorbs pollutants from the water to produce crystal clear sparkling water with no chlorine smell.

AFM® reduces the biological risk from bacteria and parasites as well as the chemical risk from water and air just above the surface. The result is a safer pool for children, a healthier work place for staff in public pools and a greatly improved swimming experience for everyone.

AFM® is successfully working in over 100'000 private and public swimming pools worldwide.

AFM® PERFORMANCE

✓ Crystal clear water:

AFM® filters at least 50 % more organics than silica or glass sand. This means less THM.

✓ Lower consumption of chlorine:

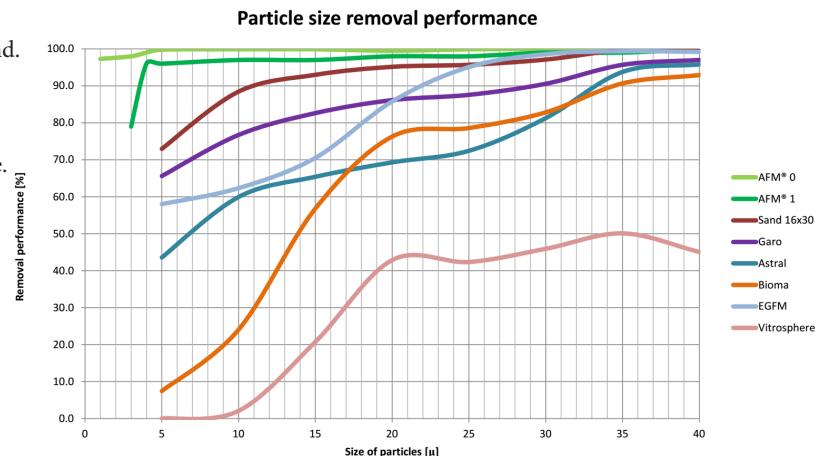

Everything filtered out doesn't need to be oxidized by chlorine. The better the filtration, the lower the chlorine demand.

✓ No trichloramine – no chlorine smell:

AFM® prevents growth of biofilm therefore eliminating trichloramine.

✓ No biofilm – no Legionella:

Biofilm is a slippery film of bacteria, that can provide a home for pathogens such as Legionella, Staphylococcus and (MRSA) Pseudomonas.

BOOST THE PERFORMANCE OF YOUR CALPLAS FILTER WITH AFM® FILTER MEDIA

Calplas filters are made to extend their life time to the limit. We care about reliability about filter performance. Backwash flows are as important as filtering flows. Use AFM in Calplas filter to optimize the performance of your filter.

Best hardware works better the best software, CALPLAS and AFM® are better together.

AFM®

WHY AFM®?

MATERIAL

AFM®activated Filter Media is a bio-resistant filter media made from brown and green glass.

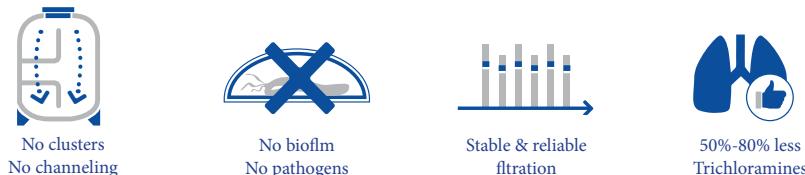

1. No clusters or channeling forming in the filter for continuous high filtration performances over many years.
2. Less problems with Legionella, Pseudomonas or Cryptosporidium.
3. Less chlorine smell, 50% less Trichloramines and 50% less THM's are created.

ACTIVATION

The unique, patent protected activation process creates a high negative surface charge for electrostatic filtration. As a result we reach a filtration efficiency of 4 microns or less for crystal clear water.

EFFICIENCY

High backwash efficiency results in savings of up to 50% of the backwash water for high cost efficiency.

AFM® NG NEW 2020

Organic matters are the precursor for the formation of Trihalomethanes (THMs), including chloroform. Thanks to its large hydrophobic area and highly mesoporous structure, AFM® ng can filter much finer particles and up to 50% more organic substances than sand. High filtration performance means less disinfectants are used, resulting in healthier water and better air quality at lower costs.

PACKAGING

RESIDENTIAL FILTERS

Residential filters price include carton box packaging.

RESIDENTIAL FILTERS MAXIMUM QUANTITY PER PALET

Ref	FA	HFS	AFM	AFM/P
415	10	8	*	*
460	10	8	*	*
520	10	8	4	4
640	10	8	4	4
720	8	8	4	4
840	8	4	1	1
960	2	1	1	1

PUBLIC FILTERS

Public filters with threaded connections DCH or DCH/P ($\varnothing 415$ - $\varnothing 960$) are sent in carton box which is included in the price.

Public filters with flanged connections require a wooden box crate if it is sharing transport with other loads. Please see prices below.

FB

Model	Net Price
FB-40 to FB-80	120 €
FB-100 to FB-175	195 €
FB-200	210 €
FB-250	245 €
FB-300	290 €
FB-350	325 €

COLUMNS WITH FLANGES

Model	Net Price
$\varnothing 415$ to $\varnothing 640$ mm	75 €
$\varnothing 720$ to $\varnothing 960$ mm	115 €
$\varnothing 1010$ to $\varnothing 1440$ mm	195 €
$\varnothing 1640$ to $\varnothing 2210$ mm	305 €
$\varnothing 2340$ mm	355 €
$\varnothing 2550$ mm	424 €
$\varnothing 2800$ mm	485 €
$\varnothing 3000$ mm	565 €

For some installations a direct shipment can be done with a full truck load, under this circumstances wooden box crates can be avoided under customers responsibility not to damage the filters on the unloading process.
